Stay Protected with 100% Pure Drinking Water

As groundwater use rises and climate change worsens, water quality suffers from increasing levels of harmful impurities like arsenic, fluoride, and heavy metals. These contaminants pose serious health risks, including cancer, over time. Transporting water through pipelines and storing it in tanks can further contaminate it, emphasizing the need for effective purification methods to prevent waterborne diseases. KENT water purifiers utilize cutting-edge technology to remove impurities and eliminate bacteria and viruses while preserving essential minerals. With UV LED light in the storage tank, KENT ensures purified water stays pure. BIS Indian standards and NSF international certifications validate the quality and safety.

THE KENT ADVANTAGE

KENT®
TECHNOLOGY
RO+UV+UF+TDS Controller

Multiple Purification Process for 100% Pure Water

Makes water 100% pure by killing bacteria & viruses as well as removing dissolved impurities such as arsenic, rust, pesticides, & fluorides.

Keeping Purified Water Pure

UV LED light disinfection in the storage tank keeps purified water pure.

Zero Water Wastage Technology™

Recirculates the reject water to the overhead tank, using its own pump and thus, wastes no water.

Highest Quality Certifications

KENT's Water Purifiers have been tested & certified by the world's best laboratories and been awarded NSF in USA & BIS (ISI) certificate in India.

KENT EXCLUSIVE FEATURES

ONLY KENT GIVES

High Quality Sales & Service

Only brand to offer 4 years free service along with a pan India prompt service network.

RETAINS
ESSENTIAL
MINERALS

KENT'S TDS Control Technology

Retains essential natural minerals in purified water.
